The garments on this page are flame resistant. The information presented in this page should not be used as a substitute for reviewing OSHA or other regulations and recognized safety standards or be used in lieu of official safety training or certified on site analysis. The use of flame resistant garments will provide thermal protection when worn properly. The amount of protection is generally determined based on fabric weight and composition. The customer has the best understanding of its intended use of any flame resistant merchandise or other personal protective equipment and it is always the customer's responsibility to determine that the flame resistant merchandise or other personal protective equipment that it has selected is appropriate for the intended use of the customer and its employees. The information regarding flame resistant garments provided herein is based on information from the fabric/garment manufacturers and Aramark makes no independent representations regarding these garments. Please check with the fabric manufacturer regarding specific certifications, if any, for each garment. WARNING: These garments are not intended for fire entry or structural fire-fighting activities and provide no personal protection from chemical exposure. Remove garments at once if fouled with flammable material. It is the wearer's responsibility to determine if these garments are suitable for the intended use.

Please Note: The product copy in this page is in accordance with the new NFPA 2018 Edition. However, the garment labels on our current inventory may still display codes as "HRC" until that stock is depleted, including other brand name FR garments we provide. For reflective merchandise, any garments supplied satisfy ANSI/ISEA standards only if so labeled. Aramark Uniform Services makes no representations, warranty or covenant regarding the visibility performance of any reflective merchandise. Reflective properties may be reduced or ultimately lost through laundering. It is the customers responsibility to determine if additional safety measures may be necessary under specific work conditions and if particular merchandise is suitable for the intended use.
